Ömer Can Atlı

Computer Engineer | Software Developer | AI & Backend

omercanatli.com · atli.omercan_2001@hotmail.com · +90 536 426 1897 · Maltepe, İstanbul, Türkiye · github.com/Byomer1021 · linkedin.com/in/ömer-can-atlı

Final-year Computer Engineering student at Gebze Technical University. Backend and AI focused, building across the stack: .NET and Node.js backends, React Native and Flutter clients, computer-vision and graph pipelines in Python. Creator and lead developer of two shipped products.

WORK EXPERIENCE

Intern — Network Management Directorate July 2025 – August 2025

Türk Telekom, İstanbul

- Rotational internship across Transmission, MPLS-IP, DSL, Mobile Core, Central Office and TTVPN; hands-on with xDSL/FTTH, MPLS, BNG, traffic monitoring and fault analysis.

PRODUCTS

Shorties shorties.tr — Creator & Lead Developer

- Exam-prep ecosystem turning a question bank into AI-generated short videos; one .NET Clean Architecture backend, React Native client and Python video engine across three apps. YKS live on both stores at v2 with RevenueCat subscriptions; KPSS and ALES in development.

respos resposapp.com — Creator & Lead Developer

- Multi-tenant SaaS POS for restaurants: one Node.js/Express backend serving many tenants with isolated data, React and Expo clients, JWT auth, live table plan, kitchen display and recipe-based stock.

OPEN-SOURCE PROJECTS — github.com/Byomer1021

otonomarac · live demo — Python · PyTorch · OpenCV · Gradio

Single-camera driving perception: detection, tracking, monocular depth, segmentation, ground-plane projection and time-to-collision over eight weeks. Live public demo on Hugging Face Spaces.

trafikisaret — Python · YOLO · Dataset construction

Turkish traffic-sign dataset labelled from scratch — 717 boxes over 787 frames of day, rain and night — with a two-stage detector and classifier: 0.953 test recall, mAP50 0.515.

smart-city-traffic-analysis — PySpark · GraphFrames · NetworkX · Pandas

38.3M NYC taxi trips as one graph: PageRank, Louvain communities and a node-removal simulation over 258 zones. Removing JFK splits the network into sixteen components.

plakatanima — Python · PyTorch · CTC · ONNX · TensorRT · C++

Turkish plate recognition measured end to end: 18 of 34 plates read fully automatically, a generator calibrated against 272 labelled plates, a constrained decoder in C++, and TensorRT FP16 at 24.7x on a T4.

floorplan-parser — Python · OpenCV · scikit-image · NetworkX

Floor plans to walls, doors, windows and a room graph, no learned models; door F1 0.904 on a held-out test split.

EDUCATION

Gebze Technical University Expected 2027 · Kocaeli

B.Sc. Computer Engineering

Şehit Mustafa Serin Science High School Graduated 2019 · Balıkesir

Science track

TECHNICAL SKILLS

Languages	Java, C++, C, C#, Python, JavaScript, SQL, HTML/CSS
Frameworks & Libraries	.NET, Spring Boot, Django, Flutter, React Native, Scikit-learn, TensorFlow (basic), NumPy, Pandas
Tools & Platforms	Git, Docker, Jira, Maven, Firebase, MSSQL, MySQL, SQL Server
Core Concepts	Object-Oriented Programming, Data Structures, Machine Learning, Deep Learning

LANGUAGES

Turkish — native · English — Advanced (C1)

VOLUNTEER WORK & EXTRACURRICULARS

C developer, "Besleme Kahramanları" · GTÜ Bilgisayar Topluluğu · AFAD disaster response volunteer · GETAK Search and Rescue Club
